Appl. No. 10/549,987  
Response Date: July 21, 2008  
Office Action Date: September 10, 2007

Claim 6 (Currently amended): A method of preparing the CoQ<sub>10</sub>-containing preliposomes of claim 1 which comprises:

~~prepare~~ preparing a lipid solution by one of: a) melting CoQ<sub>10</sub> and spongiamine; and b) dissolving CoQ<sub>10</sub> and spongiamine in an organic solvent; and

applying the lipid solution to an underlay to produce the CoQ<sub>10</sub>-containing preliposomes which contain spongiamine.

Claim 7 (Previously presented): The method of claim 6, wherein the underlay comprises at least one of mannitol, glucose, sorbitol, sucrose, lactose, fucose, sodium chloride and polyvinylpyrrolidone.

Claim 8 (Previously presented): A pharmaceutical composition that comprises the CoQ<sub>10</sub>-containing preliposomes of claim 1.

Claim 9 (Previously presented): A cosmetic composition that comprises the CoQ<sub>10</sub>-containing preliposomes of claim 1.

Claim 10 (Previously presented): CoQ<sub>10</sub>-containing preliposomes according to claim 5, wherein the another lipid component comprises at least one of cholesterol, soy lecithin, yolk lecithin, hydrogenated lecithin, DSPC, DPPP, poloxamer, DMPC and a non-ionic surfactant.
